Table 1. Types of Modules covered by this Limited Warranty

1. LIMITED PRODUCT WARRANTY

RUNERGY warrants its modules, including factory-assembled DC connectors and cables, if any, to be free from defect in materials and workmanship, as per the mechanical and electrical characteristics of the product's datasheet, under normal application, proper installation as per RUNERGY installation guide, use and service conditions. If modules fail to conform to this warranty, during the period as set forth at Table 1, from the WARRANTY START DATE, RUNERGY will, at its option, either repair or replace the product, or refund the current list price at the time of warranty claim resolution of comparable RUNERGY MODULES. The repair or replacement or refund remedy shall be the sole and exclusive remedy provided under the "Limited Product Warranty" and shall not be extended beyond the period set forth herein. The replacement will be Grade A modules. This "Limited

Product Warranty” does not warrant a specific power output, which shall be exclusively covered under clause 2 hereinafter (“Limited Power Warranty”).

2. LIMITED POWER WARRANTY

RUNERGY warrants that for a specific period the modules will maintain a level of performance as set forth at Table 1.

RUNERGY warrants each module against defects in materials and workmanship that result in the failure of the modules to produce the warranted percentage specified above of the nominal power output for the module set forth in RUNERGY product datasheet. If RUNERGY determines in its discretion that any module is not providing the warranted percentage of the nominal power output because of defects in materials or workmanship, RUNERGY will at its option either (1) replace such loss in power by either, (a) providing additional modules to the CUSTOMER to make up for such loss in power, or (b) replacing the defective module(s) or part by a functional equivalent; or (2) refund the percentage of the module’s price, representing the percentage of the power that is less than the warranted percentage of the nominal power according to the current list price, at the time of warranty claim resolution, of comparable RUNERGY MODULES.

The remedies set forth in this clause 2 shall be the sole and exclusive remedies provided under the “Limited Power Warranty”.

Nominal Power Output in product datasheet is the power in Watt Peak that a Photovoltaic Solar Modules generates in its Maximum Power Point under Standard Testing Conditions (STC). STC are as follows: (a) light spectrum of AM 1.5, (b) an irradiation of 1000W per square meter and (c) a cell temperature of 25 degrees centigrade at direct angle irradiation. The measurements are carried out in accordance with IEC 61215, tested at the connectors or junction box terminals, as per calibration and testing standards of RUNERGY valid at the date of manufacture of the PVmodules.

3. EXCEPTION CLAUSE

- Contamination by chemical products in the environment
- Non-observance of RUNERGY installation manual or maintenance instructions detailed in the document named <RUNERGY Solar PV Modules Installation Manual>
- Repair or modifications by someone other than an approved service technician of RUNERGY;
- Power failure surges, lightning, flood, fire, accidental breakage, improper connections resulting in

hazardous reverse current or other events outside RUNERGY control.

- Modules which have been installed and energized on a permanent structure and later removed and re-installed on a different structure for energy harvest.

3.3 Both “Limited Product Warranty” and “Limited Power Warranty” do not cover any costs associated with installation, removal or re-installation of the modules and customs clearance or any other costs for return of the modules, except as explicitly set forth in the final paragraph of Section 5.

3.4 Warranty claims will not be honored if the type or serial number of the MODULES have been altered, removed or made illegible.
